Summary — Full Stack Web Developer with expertise in Nuxt 3, Vue.js, TypeScript, and the MERN stack. Proven ability to develop high-performance, scalable web applications with a focus on clean code and user experience. Collaborative team player skilled in delivering solutions in fast-paced environments.

Skills

Technical Skills: React.js, Vue.js, Nuxt.js, TypeScript, Express.js, Node.js, MongoDB, Element Plus, HTML, CSS, JavaScript, Redux, Pinia, Vuex, driver.js

Soft Skills: Time Management, Adaptability, Problem-Solving, Team Collaboration

Experience

Greater Than Educational Technologies Private Limited

Jun 2024 – Present

Associate Software Engineer (Frontend Developer)

- **Engineered** interactive and responsive user interfaces for over 20 modules using Nuxt and Vue.js, leveraging TypeScript for type safety, and integrated with ASP.NET APIs and PostgreSQL databases, enhancing dynamic content delivery.
- **Architected** and deployed a comprehensive admin panel for educational institutions, featuring real-time student progress tracking, automated event notifications, and secure gate pass management, reducing administrative workload.
- **Developed** and delivered key features, including writing 3+ APIs in ASP.NET, implementing 10+ tour features across multiple modules, revamping 2 existing modules, and creating 2 new modules from scratch to meet business needs.
- **Enhanced** system reliability and performance by resolving 50+ bugs across all modules and implementing optimizations like efficient state management with Pinia and optimized API calls, ensuring real-time data synchronization for critical features like bus tracking and course progress monitoring.
- **Collaborated** with product managers, backend developers, and cross-functional teams to design scalable, user-friendly interfaces and manage release cycles, ensuring timely feature delivery with a focus on user experience.
- **Participated** in code reviews, ensuring adherence to best practices for clean, maintainable code development.

Una Brands

Mar 2023 – May 2023

Frontend Developer (Intern)

- **Led** the development and **revamping** of multiple Next.js pages, including transforming complex wireframes into pixel-perfect, user-centric interfaces using Next.js and Material UI, with secondary involvement in creating and maintaining Shopify pages.
- **Collaborated** with backend teams to **integrate** RESTful APIs, enabling dynamic content delivery and real-time updates, significantly improving application responsiveness.
- **Translated** complex design wireframes and mockups into fully functional, pixel-perfect web pages, adhering to project specifications and timelines.
- **Applied** advanced optimization techniques, including code splitting and lazy loading, to **enhance** frontend performance, ensuring fast load times and scalability across multiple devices and browsers.

Education

LN College

Bachelor of Computer Applications (BCA)
CGPA: 8.06

Mumbai, India

July 2019 – July 2022

Masai School

Full Stack Web Development Course

Bengaluru, India (Remote)

April 2022 – February 2023

Projects

Jack&Jones E-Commerce Clone

August 2023

- **Project Overview:** Developed a full-stack e-commerce website replicating the JackJones.in platform, with both frontend and backend built entirely from scratch.
- **Tech Stack:** React.js, Redux, MongoDB, Express, Node.js, Chakra UI
- **Links:** 🌐 [GitHub](#) | 📄 [Deployed Site](#)
- **Key Features:** User authentication (sign-in/signup), category-based product listings, shopping cart functionality, and secure checkout process with multiple payment options.
- **Key Contributions:**
 - Developed backend functionality for user authentication and integration with the frontend.
 - Implemented cart functionality and checkout system, including multiple payment options.
 - Focused on troubleshooting, debugging, and ensuring smooth functionality for both the frontend and backend.
