Summary

Frontend-focused Full Stack Engineer with 2+ years building responsive, type-safe web applications in Vue.js, Nuxt 3, React, and TypeScript. Shipped 20+ production modules, an institution-wide admin platform, and an in-house design system, with hands-on experience in REST API integration, state management, and performance optimization. Leverages AI-assisted development (Claude Code, OpenAI Codex, Cursor) to accelerate delivery while owning code quality, review, and testing.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SQL

Frontend: React.js, Redux, Vue.js, Nuxt 3, Next.js, Pinia, Vuex, Element Plus, Material UI, Chakra UI, SCSS, Design Systems, Storybook, Responsive Design

Backend: Node.js, Express.js, ASP.NET Web APIs, RESTful APIs

Databases: MongoDB, PostgreSQL

AI Tools: Claude Code, OpenAI Codex, Cursor, Antigravity, GitHub Copilot, ChatGPT, Gemini, MCP, Agentic Workflows

Tools & Practices: Git, GitHub, Agile/Scrum, Code Reviews, Performance Optimization (code splitting, lazy loading)

Experience

Associate Software Engineer (Frontend Developer) Jun 2024 – Present
Greater Than Educational Technologies Pvt. Ltd. *Hyderabad, India*

- Built interactive, responsive UIs for 20+ modules in Nuxt 3 and Vue.js with TypeScript, integrating ASP.NET REST APIs and PostgreSQL to deliver dynamic, type-safe content across the platform.
- Architected and shipped an institution-wide admin panel with real-time student progress tracking, automated event notifications, and gate-pass management, reducing manual administrative workload for staff.
- Built the frontend for nScribe AI, a Gemini-powered call-analytics platform processing 600K+ parent call transcriptions, with dashboards for sentiment, dropout-risk scoring, issue categorization, and state-to-class drill-downs.
- Built an in-house design system from scratch: 30+ reusable Vue/TypeScript components (tables, filters, modals, form controls) documented in Storybook, with design tokens, modular SCSS, and Element Plus theming.
- Delivered 7 modules from scratch and revamped 2 existing ones, authored 3+ ASP.NET REST APIs, and implemented 10+ guided in-app tours (driver.js) to improve onboarding and feature adoption.
- Optimized client state with Pinia and refactored API calls to enable real-time data synchronization for high-traffic features such as live bus tracking and course-progress monitoring.
- Accelerated feature delivery and resolved 50+ cross-module defects using AI-assisted workflows (Claude Code, Cursor, Codex) for scaffolding, refactoring, and debugging, with all generated code reviewed and tested.

Frontend Developer (Intern) Mar 2023 – May 2023
Una Brands *Bangalore, India*

- Built Next.js pages with Material UI from wireframes into pixel-perfect, responsive UIs; maintained Shopify storefronts.
- Integrated RESTful APIs with backend teams to power dynamic content and real-time updates, improving responsiveness.
- Applied code splitting and lazy loading to reduce bundle size and accelerate page load times across devices and browsers.

Projects

Jack&Jones E-Commerce Clone Aug 2023
React.js, Redux, Node.js, Express, MongoDB, Chakra UI *GitHub | Live Demo*

- Built a full-stack JackJones.in clone with authentication, category listings, cart, and multi-option checkout.
- Built REST APIs in Node.js/Express backed by MongoDB and connected them to a Redux-managed React frontend for consistent global state.

Education

Bachelor of Computer Applications (BCA) Jul 2019 – Jul 2022
LN College *Mumbai, India | CGPA: 8.06*

Full Stack Web Development Program Apr 2022 – Feb 2023
Masai School *Remote, India*
